Summary

Aspiring Software Engineer with hands-on experience in full-stack and web application development through real-world projects and internships. Skilled in Java, JavaScript, HTML, CSS, Kotlin, MongoDB, and modern software development practices with experience building AI-driven and interactive web applications. Passionate about developing scalable, secure, and user-focused software solutions.

Experience

AR/VR Campus Navigation Intern

Nov 2025 - Present

Parul University | Vadodara, Gujarat

Onsite

- Developed and deployed a responsive web application using HTML, CSS, and JavaScript with dynamic JSON based data handling.
- Designed interactive and user-friendly frontend interfaces to improve usability, responsiveness, and overall user experience.
- Managed version control and collaborative development workflows using GitHub for efficient code maintenance and project tracking.
- Deployed and maintained the application on Vercel, optimizing performance, accessibility, and cross-device compatibility.

App Development Intern

Sep 2025 - Oct 2025

Code Alpha | Lucknow

Remote

- Developed Android applications using Kotlin and XML with clean and responsive user interfaces.
- Built a Flashcard Quiz App with features like add, edit, delete, navigation, and answer reveal functionality.
- Created a Random Quote Generator that displays dynamic quotes and author names with minimal UI design.
- Improved problem-solving, mobile app development, and UI designing skills through practical project implementation.

Technical Skills

Programming languages: Java, C++, C, SQL

Web Development: Node.js, MongoDB, HTML5, CSS3

Backend & Database: JavaScript, MongoDB, NodeJS, Firebase

Tools & Platforms: AWS, Git, GitHub, Render, Vercel, Linux, VS Code

Projects

360 Indoor Campus Navigation | HTML/CSS, JavaScript, VR Technology

[LiveDemo](#) | [GitHub](#)

- Developed an immersive 360° indoor campus navigation platform with interactive virtual reality experience and hotspot-based navigation.
- Designed responsive and modern user interfaces for seamless campus exploration across multiple devices and screen sizes.

AI-Lead Automation Software | React.js, Node.js, Express.js, MySQL, OpenAI API [LiveDemo](#) | [GitHub](#)

- Developed an AI-powered lead automation platform to streamline customer lead management and automated communication workflows.
- Integrated AI APIs for intelligent response generation, lead qualification, and automated customer interaction handling.
- Built secure authentication, RESTful APIs, and database management features for efficient lead tracking and user management.
- Designed a responsive and scalable full-stack application with optimized frontend performance and backend data processing.

Education

Parul University, Vadodara, India

2023 – 2027

Bachelor Of Technology (Computer Science Engineering with AI)
